

HKIE Building Division 22nd Annual Seminar

Empowering the Future:

Sustainable Innovation for the Next Generation

21st March 2025 (Friday) | 09:00 - 16:45
Theatre 2, Hong Kong Convention & Exhibition Centre

To explore the vital role of sustainability and innovation in shaping the future of the building and construction industry. The 22nd Annual Seminar will emphasize empowering the next generation of engineers, architects, and builders to create a sustainable built environment.

This year's seminar aims to explore the critical intersection of sustainability and innovation within the building and construction industry, focusing on how we can empower future generations to create a more sustainable built environment.

The seminar provides a platform and opportunity for professionals to gather, discuss, and learn about the latest trends and technologies in sustainable practices and innovative solutions.

*Participants are required to bring along student ID on the event day for registration.
